# INTEGRATED CIRCUITS

# DATA SHEET

# **74F641/**74F642\* Transceivers

\* Discontinued part. Please see the Discontinued Product List.

Product specification Supersedes data of 1989 Nov 27 IC15 Data Handbook 1999 Jan 08

Transceivers 74F641/74F642\*

74F641 Octal Bus Transceiver with Common Output Enable, Non-Inverting (Open Collector) 74F642 Octal Bus Transceiver with Common Output Enable, Inverting (Open Collector)

#### **FEATURES**

- High-impedance NPN base inputs for reduced loading (20μA in High and Low states)
- Octal bidirectional bus interface
- Common Output Enable for both Transmit and Receive modes
- Open collector outputs sink 64mA
- —74F641, non-inverting—74F642, inverting

#### **ORDERING INFORMATION**

| DESCRIPTION        | COMMERCIAL RANGE $V_{CC}$ = 5V $\pm 10\%$ , $T_{amb}$ = 0°C to +70°C | PKG DWG # |
|--------------------|--|-----------|
| 20-pin plastic DIP | N74F641N   | SOT146-1  |
| 20-pin plastic SOL | N74F641D   | SOT163-1  |

| TYPE   | TYPICAL<br>PROPAGATION<br>DELAY | TYPICAL SUPPLY CURRENT (TOTAL) |
|--------|---------------------------------|--------------------------------|
| 74F641 | 8.0ns                           | 69mA                           |
| 74F642 | 8.5ns                           | 52mA                           |

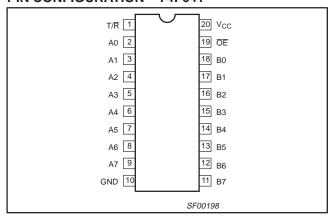

# INPUT AND OUTPUT LOADING AND FAN-OUT TABLE

| PINS             | DESCRIPTION            | 74F(U.L.)<br>HIGH/LOW | LOAD VALUE<br>HIGH/LOW |
|------------------|------------------------|-----------------------|------------------------|
| A0 - A7, B0 - B7 | Data inputs            | 1.0/0.033             | 20μΑ/20μΑ              |
| T/R              | Transmit/Receive input | 2.0/0.067             | 40μΑ/40μΑ              |
| ŌĒ               | Output Enable inputs   | 2.0/0.067             | 40μΑ/40μΑ              |
| A0 - A7          | Data outputs           | OC/40                 | OC/24mA                |
| B0 - B7          | Data outputs           | OC/106.7              | OC/64mA                |

2

**NOTE**: One (1.0) FAST unit load is defined as: 20μA in the High state and 0.6mA in the Low state. OC = Open Collector.

#### NOTES:

<sup>1.</sup> For conditions shown as MIN or MAX, use the appropriate value specified under recommended operating conditions for the applicable type.

<sup>2.</sup> All typical values are at  $V_{CC} = 5V$ ,  $T_{amb} = 25$ °C.

Transceivers 74F641/<del>74F642</del>\*

# **AC WAVEFORMS (Continued)**

For all waveforms,  $V_M = 1.5V$ .

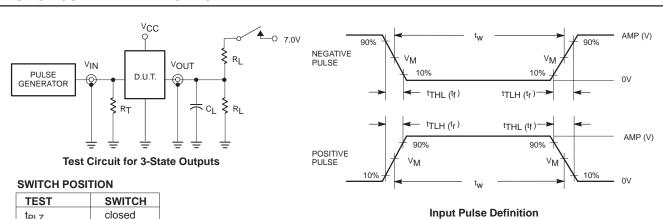

Waveform 3. Propagation Delay for  $\overline{\text{OE}}$  to An or Bn Outputs (74F642) (Bn or An Inputs in High State)

Waveform 4. Propagation Delay for  $\overline{\text{OE}}$  to An or Bn Outputs (74F641) (Bn or An Inputs in Low State)

# **TEST CIRCUIT AND WAVEFORMS**

| TEST             | SWITCH |
|------------------|--------|
| t <sub>PLZ</sub> | closed |
| t <sub>PZL</sub> | closed |
| All other        | open   |

# **DEFINITIONS:**

R<sub>L</sub> = Load resistor;

see AC electrical characteristics for value.

C<sub>L</sub> = Load capacitance includes jig and probe capacitance; see AC electrical characteristics for value.

R<sub>T</sub> = Termination resistance should be equal to Z<sub>OUT</sub> of pulse generators.

| family   | INPUT PULSE REQUIREMENTS |                |           |                |                  |                  |  |  |
|----------|--------------------------|----------------|-----------|----------------|------------------|------------------|--|--|
| lallilly | amplitude                | $V_{\text{M}}$ | rep. rate | t <sub>w</sub> | t <sub>TLH</sub> | t <sub>THL</sub> |  |  |
| 74F      | 3.0V                     | 1.5V           | 1MHz      | 500ns          | 2.5ns            | 2.5ns            |  |  |

#### Data sheet status

| Data sheet status         | Product status | Definition [1]  |
|---------------------------|----------------|---|
| Objective specification   | Development    | This data sheet contains the design target or goal specifications for product development. Specification may change in any manner without notice.   |
| Preliminary specification | Qualification  | This data sheet contains preliminary data, and supplementary data will be published at a later date. Philips Semiconductors reserves the right to make chages at any time without notice in order to improve design and supply the best possible product. |
| Product specification     | Production     | This data sheet contains final specifications. Philips Semiconductors reserves the right to make changes at any time without notice in order to improve design and supply the best possible product.  |

<sup>[1]</sup> Please consult the most recently issued datasheet before initiating or completing a design.

#### **Definitions**

**Short-form specification** — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information** — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

#### **Disclaimers**

**Life support** — These products are not designed for use in life support appliances, devices or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

Right to make changes — Philips Semiconductors reserves the right to make changes, without notice, in the products, including circuits, standard cells, and/or software, described or contained herein in order to improve design and/or performance. Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
